When used together, these medications can help treat scalp conditions such as seborrheic dermatitis. A common condition that causes an itchy (and flaky) scalp. The combination of sertaconazole nitrate and mometasone furoate can help alleviate "symptoms" such as itching.

It is important to follow the instructions provided by your healthcare provider when using these medications. Typically, the solution is applied directly to the scalp and massaged in "gently". You may take several weeks of use to see improvement on symptoms.

As with any medication, sertaconazole nitrate and mometasone furoate topical solutions can cause side effects. Common side effects may include itching, burning (or irritation at the applied site).

If you experience severe symptoms such as worsening of symptoms or

are immediately!

In summary, sertaconazole nitrate and mometasone furoate topical solution is a medication used to treat scalp conditions such as seborrheic dermatitis. By combining an antifungal medication and a corticosteroid,

allowing

The increased file size was due to the increased amount of content at launch, including map files for Warzone, as well as the Zombies mode, and the fact that a lot of content from Modern Warfare II carries over to Modern Warfare III.
