<p&gt;&lt;/p&gt;&lt;p&gt;The TL;DR version of this review is: surprising ligh
t, extremely pocketable, does the job, not my dream charger but at
   s well worth it.</p&gt;
<p&gt;We ve covered a product of Lepow s before, the Moonstone. Like the Moon
                        , with a cloth carrying case that you can stash a USB ca
stone, the Poki comes
ble in (it appears to come with a 6 ‡ , USB-> MicroUSB,) or chuck your ID an
d credit card in and use it as a wallet while you re out. It s , actually the
first thing that stood out when I was looking at the device. The Moonstone is st
ill going strong
                , with a friend of mine a year later.</p&gt;
<p&gt;The battery delivers a 90% conversion efficiency rating according to sp
             , manufacturer s website. Most batteries go from the high 70 s to m
id 80 s. You want to see a higher number as
                                              , this is how much power gets deli
vered with the rest being lost in conversion.</p&gt;
<p&gt;The Poki can charge and recharge at , 2.1amps. This means you re not
stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you should
   , be able to charge this in under five hours and with 90% conversion efficien
cy you should have around 9000mAh of
                                       , actual juice to spare. That should be e
nough for at least three complete charges from dead to full for any , smartpho
ne on the market today.</p&gt;
<p&gt;2.1 amp charging also means you re not going to spend ~7 hours charging
                  , from dead, more like an hour and a half if your phone suppor
a 3000mA phone
ts it.charging that fast.</p&gt;
