Fruit Crash is a popular game on the mobile platform, and it's guaranteed to be a success among gamers. But sometimes, you might wonder how it works.

Algorithm and Mechanics

The algorithm for Fruit Crash is based on a random generator to determine which fruits appear on the screen, but the player has the ability to influence the results by making strategic decisions.

Selection and Rejection of Fruits: The game presents the player with a selection of fruits. The player must choose which fruits to reject and which to accept, as the chosen fruits determine the score.

Participant and Fruit Types: The player can see the types of fruits displayed on the screen.

Placement of Fruits: After selecting the fruits, they are placed on the screen. The player must rotate the position of the fruit to adjust the positions of the same and create lines or columns of the same type of fruit, which will disappear.
