The odds against winning is a ratio of 3:1, meaning

the odds against winning are 3 to 1. Thus, the probability of winning is 0.25,

or 25%.

If the odds of winning are 3:1 against, what is the probability of winning?

homework.study : explanation : if-the-odds-of-winning-are-3-1-again...

3 & 1: This means that

one player had a two-shot lead going into the 17th hole, and won that

hole so they won by three and there was just a single hole to play.

They played 17 because had their opponent won the last two holes, the match

could have ended in a draw.
