<p></p><p><p>To fully exploit the constrained width, avoid loadin
g the neighbouring structures and straddle shared utilities running under the si
te, the 💷 house was constructed using a lightweight steel frame on a pi
led slab. The steelwork was prefabricated as a series of 💷 portal frame
s that were craned down the alley and site-welded together. Given that every inc

ed specialist fabricators for certain key packages as well as undertaking a fair
amount of the work ourselves.</p>
<p>The 💷 result is a unique and highly crafted home that is a tes

line without making a hard boundary. 💷 The development highlights the
