<p></p><p>To fully exploit the constrained width, avoid loading the neighbouring structures and straddle shared utilities running under the site, the 👄 house was constructed using a lightweight steel frame on a piled slab. The steelwork was prefabricated as a series of 👄 portal frames that were craned down the alley and site-welded together. Given that every inch in such a narrow space 👄 was valuable we chose to fully weld the connections and express the frame internally, even utilising the depth of the 👄 steels to maximise the space.</p>
<p>Alongside the painted steel a simple palette of spruce plywood, douglas fir joists, terrazzo and cork 👄 flooring enriches the interior. Externally the timber framed walls are clad in handmade pewter glazed brick slips with a patina 👄 that reflects the changing light of the sky. Both the simply landscaped and planted rear courtyard and the garden in 👄 front of the house enhance the feeling of space in this small dwelling.</p>
<p>This self-build project had a long gestation, fitted 👄 in around professional and family life. The design and construction were developed as time and money allowed so whilst planning 👄 consent was given in January 2014 and the ground works commenced in the spring of 2024, the building was not 👄 completed until August 2024. We worked closely with friend and joiner Michael Tye to lead a small team of local 👄 subcontractors and employed specialist fabricators for certain key packages as well as undertaking a fair
