The matchmaking system present in the console versions

(and those PC versions that do not use dedicated servers) of Call of Duty games

works by gathering players into a lobby (a room players are grouped together)

who hosts the server that all other players connect to

Capacity on demand (COD) is a purchasing option that

allows companies to receive equipment with more computer processing, storage

or other capacity than the company needs at the time of purchase, and have that

extra capacity remain unused and unpaid for until the company actually requires

it.

What is capacity on demand (COD) and how does it work? - TechTarget
