Decreased sunlight can cause drops in your body's

production of serotonin, a brain chemical that helps to determine mood.

Lack of light can also alter the brain's balance of melatonin, a chem

ical produced during the hours of darkness that helps to govern sleep patterns a

nd mood

The Dangers of Winter Darkness: Weak Bones, Depression and Heart ...

O O bet365

We are affected a great deal by being

more tired.

And it's very much due to our physiological processes

in the body. The sleep hormone we have called melatonin is secreted in the bod

y when it's dark.

How the body is affected by sleep deprivation and darkness
